**WHOLESALE  
TRADE LIST**

**Spring  
1906.**

**W**E cater to the plant buyer who appreciaest the value of quality. It requires little skill, less ground and but a layman's attention to grow the ordinary run of stock and if you are seeking to buy nursery stock at the lowest possible price you must not expect to get the best quality. We prefer to grow "quality" and allow "price" to arrange itself; not an exhorbitant price but a fair return for what we sell you.

¶ In dealing with us you get the benefit of our half a century's experience and the best work of an efficient force of men trained along practical lines. Is it not more satisfactory to entrust your orders to a firm recognized as one of the foremost in its profession?

¶ Do you want quality or the lowest price obtainable?

¶ We guarantee satisfactory service and first quality stock in all business entrusted to us.

# Wholesale Trade List

SPRING 1906

**I**N preparing this, our Wholesale Trade List for Spring 1906, we have aimed to present our large collection of Hardy Ornamentals to the purchaser in the most concise form. With this object in mind and in view of the fact that it is intended for the trade, illustrations and descriptions have been purposely omitted. To those unacquainted with the stock, however, we will gladly furnish descriptive matter upon application. In fact, we delight in giving information pertaining to Hardy Ornamental Plants and inquiries are solicited.

**Customers** are requested to state the mode of conveyance by which they desire their trees forwarded. When no route is named we forward to the best of our judgment.

**Responsibility**—After goods are placed on board cars here we assume no responsibility for their safe or prompt delivery, or any injury caused by delay in delivery by the transportation company.

**All Claims** must be made upon receipt of goods.

**Terms Cash**, on or before delivery to express or railroad agents, unless by special arrangement.

**Two Hundred and Fifty**, twenty-five and five will be furnished at the thousand, hundred and ten rates respectively.

**Packing Charged Extra**, but only sufficient to cover cost of time and material.

**Post Office Orders payable at Dreshertown, Montgomery Co., Pa.**  
**Telegraph Office, Ambler, Pa.**

**Visitors** are always welcome and should take train at the Reading Terminal, 12th and Market Streets, Philadelphia, for **Camp Hill Station**, or at Broad Street Station, Pennsylvania R. R., for **Fort Hill Station**. Be sure that the train you take stops at these stations.

**Notice.**—It is necessary that you should **Telephone** us (Bell Phone, 26 Fort Washington; Keystone Phone, 76-Y Jenkintown), in advance of your coming, so that we can send a carriage to the station for you. Our office is  $2\frac{1}{2}$  miles from either station.

---

[COPY OF CERTIFICATE]

## THE COMMONWEALTH OF PENNSYLVANIA

### DEPARTMENT OF AGRICULTURE

#### Certificate of Inspection of Nursery Stock No. 744.

This is to certify that the stock in the nursery of **THOMAS MEEHAN & SONS, INC.**, of Dreshertown, County of Montgomery, State of Pennsylvania, was duly examined in compliance with the provisions of the Act of Legislature of Pennsylvania, approved the 10th day of June, A. D., 1901, and it was found to be apparently free from San Jose Scale and other dangerously injurious insect pest or pests. Examination made by **GEO. C. BUTZ**, Inspector, Department of Agriculture.

This Certificate expires July 31, 1906.

Dated Harrisburg, Pa., August 17, 1905

**GEO. C. BUTZ**, Inspector.

Inspected August 3rd, 1905.

*A. B. Critchfield,*  
*Secretary of Agriculture.*

# Deciduous Trees

"Trans." signifies the stock has been once or more transplanted.

"Seed." that it is still in seedling beds.

Where stock is marked "Specimen" it indicates trees that have been several times transplanted, of good shape, straight stems, and have been grown especially for individual specimen trees.

5 to 6 ft. trans. heavy.....	4 00	35 00	
6 to 7 ft. trans. heavy, specimens....	5 00	40 00	

The *Acer Ginnala* is one of the best bush-like trees in cultivation, and should be largely used in park and cemetery plantings, either as a single specimen, or in large masses. Nothing surpasses the richness of its coloring in the fall. It can also be used for ordinary hedges. It grows dense and compact and will stand any amount of shearing. It is perfectly hardy, and we can especially recommend it for this purpose.

## JAPANESE MAPLES

All of the Japanese Maples offered by us are of our own propagation. Customers who have planted them side by side with the rough, hide-bound and poorly rooted imported Japanese plants quickly recognize the merits of our home-grown stock. It is worth the little additional price charged over the imported stock. Note that most of the stock offered is pot grown. They transplant more easily by handling them in that way. All field-grown stock has been frequently transplanted.

3 to 4 ft. trans, extra heavy, bushy plants	3 50	30 00	

We have perhaps the largest and finest stock of Judas, both American and Japanese, in the country. The plants are strong, bushy and well rooted. We call particular attention to the specimen sizes of both varieties. These were recently

transplanted, and set sufficiently wide apart in the rows to afford room to develop. They are extremely useful where plants are required to produce immediate effect.

## OAKS

We believe we are the largest growers of Oaks in the United States, and we feel sure that there is no finer stock growing anywhere. Our soil seems particularly adapted to the growth of the Oak. Our trees are well furnished, with bushy heads, and good straight stems. They are stocky and have the best of roots. We get practically no tap root, and in digging we do not allow our men to cut the roots,—they are taken out with the whole root. Note the heavy specimen trees which we offer. They are something extra fine, and where a large, well-developed specimen is required, nothing better could be gotten.

Attention is called to the "Specimen" trees offered throughout the catalogue. These trees have been frequently transplanted, set wide apart in nursery rows,—mostly 6 by 8 ft. apart,—and have been given ample room to develop.

These trees are especially useful where individual specimens are required for an immediate effect.

The "specimen" Sugar Maples are particularly fine.

# Deciduous Shrubs

"Trans." indicates that the plant has been once or more transplanted.

"Seed." that it is still in seedling beds, not transplanted.

Shrubs marked "Specimen" are large, well-developed plants that have been several times transplanted and given room to develop.

This is exceptionally fine stock for planting for immediate effect.

12 to 15 in. bushy, from 5 in. pots..	4 00	35 00	

Though the *Azalea amoena* is perfectly hardy, we find that it transplants more successfully if pot-grown plants are used, consequently we grow all of our plants in this way. When we ship we knock them out of the pots and tie up the ball to prevent its breaking.

The crus galli and coccinea make excellent hedge plants where a protective hedge is required. The plants should be cut well down to the ground when they are set out, and if this is done they will make a good bushy hedge the first year.

The Desmodiums are excellent plants of an herbaceous character for setting in shrubbery beds. They bloom in August and September. Being of an herbaceous character the tops die to the ground in the fall and shoot up in the spring stronger than the year previous. They are remarkably attractive, and are one of the most valuable plants of this character.

This is one of the new varieties of Deutzia. It is of stronger growth than the gracilis, but not nearly as large as the crenata. It has white bunches of flowers which are borne in great masses quite as abundant as the gracilis. Indeed, it is being largely used in place of the gracilis.

We grow a great many thousands of this plant every year, and supply the trade largely with them. Our plants are good

and strong and well rooted. We desire to call particular attention to the 3½ to 4 ft. and the 4 to 5 ft. stock. They are very heavy and bushy. Other stock may be offered cheaper, but a comparison of the plants will show that our plants are twice as bulky as the cheaper stock of the same height.

## LIGUSTRUM IBOTA

The severe winters of the past two years have injured the *Ligustrum ovalifolium* or California Privet to such an extent that planters have ceased to use it as largely as in the past, a more hardy variety being required. The *Ibota* Privet has all the merits and good qualities of the California Privet, and in addition it is very hardy, and for this reason it is largely superseding the California. We have probably the largest stock of 2 to 3 ft. and 3 to 4 ft. sizes in the country. They are all good bushy plants, transplanted, and with good roots. We recommend this Privet as being the best of all the varieties for hedging purposes.

**BEWARE** of the so-called *Ligustrum Ibota* imported from Europe. It is not the true variety and is not hardy. We have imported the so-called *Ibota* Privet from many European sources and in every case we have received the *sinensis*, which is not hardy very far north of Philadelphia and not at all in the Northwest.

We call particular attention to the new hybrid rugosa rose Conrad Ferdinand Meyer. We flowered it on our grounds for the first time this year and are very much pleased with it. It is a strong grower, having a great many of the characteristics of the rugosa. The flowers are double and full. The outer petals are of a very light pink, while the inner petals are of a darker pink and the flowers are very fragrant. It seems to be a free bloomer, and we believe that it will be found extremely hardy. The new shoots springing up from the roots are very strong and vigorous, and these shoots, together with the leaves on them, are of a purplish red color, making a very striking appearance. These roses should be found in all collections, and as a bedding rose, where a good hardy variety is required, we know of nothing better.

## NEW LILACS

### White, Red and Purple, Single and Double

There have been a great number of new lilacs introduced within the past five or six years. The list of varieties is a long one, but many of them are quite similar in general appearance. The following list has been selected for its distinct character, and we believe are the best of the many varieties.

This is the Viburnum so largely planted throughout the New York parks. The leaves are large, of a dark green color and of a thick leathery character. The flowers are white in flat heads. The leaves remain very late on the plants. It is a very desirable variety for mass planting.

In many parts of the United States and Canada, Box Edging is not hardy, and a low, dwarf and compact plant is required as a substitute for it. The *Viburnum opulus nanus* has been found to be an excellent substitute for the Box Edging. It is naturally of a dwarf habit and will stand a lot of shearing, so that it can be kept down to a very small size. It does not bear any flowers and the leaves are smaller than the other varieties of *Viburnum*. It is perfectly hardy and can be planted in any part of the United States and Canada.

5 to 6 ft. trans. specimens.....	3 50		

The *Viburnum tomentosum* is of a similar character and habit to the *Viburnum plicatum*, but instead of having balls of flowers, they are flat headed. In leaf and general growth it is about the same as the *plicatum*, and in fact it is frequently mistaken for that variety. It is perhaps a little stronger grower than the *plicatum*, and in some respects it is to be preferred. We have a particularly large and fine stock of this plant, and call attention to some of the specimen plants which we offer.

## Evergreens

All our evergreens have been once or more transplanted, the larger sizes several times, and the choice varieties we move in a period not exceeding two years. These choice varieties are all dug with a ball of earth and the ball sewed in a mat. This makes transplanting almost an assured success. Our evergreens should not be confused with the low-priced plants frequently offered. We move them constantly in order to secure a good root growth, and they are less liable to loss when shipped.

## THUJA OCCIDENTALIS PYRAMIDALIS

### Pyramidal Arbor-Vitæ

We have the finest stock of both American and Pyramidal Arbor-Vitæ in the country — ranging in sizes from two to seven feet.

These trees have been carefully grown, transplanted and dug with a ball of earth. The ball is wrapped in burlap, enabling us to ship the stock without disturbing the roots or breaking the ball. This is the only safe and satisfactory way to ship evergreens.

We delivered last spring an order of 575 of these Pyramidal Arbor-Vitæ and the loss from transplanting was only 16 plants.

The American Arbor-Vitæ offered are more bushy than the Pyramidal, and are first-class in every respect.

Customers requiring a car-load or more of these trees are requested to write us, as we can make a reduced rate on car-load lots.

## Vines and Climbers

We direct particular attention to our "Pot Grown Vines." They are well-established plants, strong, vigorous and well grown. They are shipped without breaking the ball. The best results are obtained from using potted plants. Potted plants are especially recommended for planting in the late spring and summer, rather than field grown stock.

# Nurserymen's Supplies

## THE BEST NURSERY SPADE

Either Square or Taper Blade

Send Your Order Now. Don't Leave It Too Late

D Handle, Double Strap, Reinforced Nursery Spade. Weight, 9½ lbs.

We have experimented with a number of different makes of nursery spades, but find this to be the strongest, best and most durable on the market. We have been using this spade for a number of years, and it will stand more hard work than any other make. It is strapped full length of handle, both back and front, and half way up it has double straps, strengthening it in what otherwise would be its weakest parts. When ordering state if straight or taper blade is wanted. Price, \$1.75 each; \$20.00 per doz.

## PRUNING SHEARS, BUDDING AND PRUNING KNIVES

The sheers and knives offered, excepting the "Empire," are the celebrated "Maher & Grosh" make, which is sufficient guarantee of their excellence. No better knives are made. All blades are guaranteed "razor steel" and have been thoroughly tested.

Bear in mind, our prices are for the goods POSTPAID at your risk. If you wish them by registered mail add eight cents to your order.

### PRICES INCLUDE POSTAGE

**Pruning Knife "A,"** . . . . . 75c. each, 6 for \$3.75

This is the best light-weight pruning knife on the market, and is suited to all general work. Ebony handle.

**Pruning Knife "B,"** . . . . . 85c. each, 6 for \$4.75

Round handle, steel cap on end. Strong blade. Made for nurserymen who want a strong tool and keen edge. Blade oil tempered. The strongest pruning knife made.

**The "Empire" Budding Knife,** . . . . . 80c. each, 6 for \$4.50

We warrant it. This is the finest budding knife on the market. Made expressly for us, and we warrant every knife to be first-class. Blade closes. Best razor steel. All ivory handle, tapered at end for raising the bark. If you want a good, durable budding knife, buy the "Empire."

**Budding Knife "C,"** . . . . . 25c. each, 6 for \$1.30

Stationary blade. High temper, equal to any razor.

**Budding Knife "D,"** . . . . . 35c. each, 6 for \$2.00

Cocoa handle, razor steel. Blade closes. The end of the handle is tapered to form a wedge for raising the bark.

**Pruning Shears "E,"** . . . . . 75c. each, 6 for \$3.90

These are A No. 1 in quality and are the kind in general use

**Pruning Shears "F,"** . . . . . \$1.00 each, 6 for \$5.75

This is a forged steel pruner, patent spring of wonderfully easy but powerful working capacity. There is not a stronger or better pruning shear on the market. It will out-wear two of any other style. The best is the cheapest in the end.

## RAFFIA. RED STAR BRAND

1 lb. . . . .	15 cts. per lb.
1 lb (postpaid) . . . . .	30 " "
25 lbs. . . . .	11 " "
50 lbs. . . . .	10 " "
100 lbs. . . . .	9½ " "
1 bale (about 225 lbs) . . . . .	9 " "
2 bales . . . . .	8¾ " "
5 bales . . . . .	8½ " "

Order "Red Star" brand and you will get raffia of a good, even grade. No risk attached for we replace any that proves inferior. Fair, is it not? Ask for sample. We'll pay the postage.

**NURSERYMEN'S SUPPLIES.—Continued****LABELS**

The following are the kinds mostly used by nurserymen. For 10,000 or more we allow a discount of 10 per cent. 1,000 of 3½-inch and 100 6-inch in a package. Not less than a full package sold.

3½-inch, notched, iron-wired, painted	.	.	.	\$1.00 per 1000
3½ " " copper-wired, painted	.	.	.	1.25 "
6 " " painted, but not wired	.	.	.	2.35 "
6 " " not painted nor wired	.	.	.	1.75 "

**NEPONSET PAPER FLOWER POTS****UNBREAKABLE, LIGHT, ECONOMICAL**

Use our Neponset Paper Pots for making shipments of potted plants. Better than clay pots, because as they weigh but one-tenth as much you save on the transportation charges and there is no breakage. Better than wrapping in paper, because they hold the ball of earth firmly and require less time to prepare the shipment. Made of water-proof paper and so constructed as to allow ample drainage and plenty of air. If you ship potted plants, you simply cannot adopt better measures to have your shipments arrive in good condition than to use these pots. We use them. Seven sizes. Send for prices and samples.

**OUR BOOK DEPARTMENT**

We have made it a point to keep posted on the different works pertaining to agriculture and horticulture, and if you need a book treating on any particular phase of these subjects write us for a list.

Ask for synopsis of *Bailey's Nursery Book*. This is probably the best book for nurserymen at the price (postpaid only \$1.00) that has ever been published. The fact that it is now in its eighth edition speaks well for its popularity.

**REGISTERING TREE CALLIPER**

Capable of measuring a tree from ⅛ inch up to 4 inches calliper. Can be adjusted to any size within this capacity. Nickel-plated. Postpaid for 75 cents.

**TREE AND SHRUB SEEDS**

We issue a special catalogue of these. It will be mailed on application.

**PROFIT BY OUR FORESIGHT**

Do not overlook the fact that this catalogue contains the largest assortment of *young stock* for lining out that has ever been offered. A list of this stock exclusively will be mailed you if desired. It represents not only an immense variety, but contains many items that *cannot be purchased elsewhere*. Stock that we had intended to transplant but are unable to do so for lack of ground. This is an unusual opportunity for you to secure some choice stock. If you would utilize it, *order early—NOW*.

**FRUIT STOCKS AND SEEDS**

Ask for "Special Reduced Prices" on what you want and if we still have the stock, a bargain is in store for you. In Stocks we have Apple 3/16 and up, 2 to 3/16, French Pear 6 to 10, Mazzard Cherry 6 to 12, Mahaleb Cherry 3 to 4, Myrobolan Plum 3 to 5, Quince 7 to 12. In Seeds we have French Crab, French and Kieffer Pear, Myrobolan Plum, Quince and Mahaleb Cherry. *But only in limited quantities*. State quantity desired. Write NOW or the other fellow may get the benefit of the low prices.

**MANETTI ROSE STOCKS**

A medium grade, selected especially for florists, and a 5 to 10 m/m size. Well-rooted. Samples free. Ask for special price on quantity desired.

**RETINISPORA PISIFERA**

Represents a 5 feet tree

## **SPECIMEN EVERGREENS**

We have devoted considerable time and space in our nursery to the production of first-class choice specimen evergreens of all sizes.

These evergreens have been several times transplanted, some of them every year for the past three years. They have been carefully sheared and given ample room to develop, so that each evergreen, no matter how large or small it may be, is a perfect specimen of dense, compact and symmetrical form.

On account of the numerous times they have been transplanted, each plant is dug with a ball of earth and the ball sewed in burlap, so that a customer in transplanting the tree can handle it with perfect safety and with every reasonable chance of its success.

It costs money to produce this class of stock and it cannot be sold at prices to compete with evergreens that have not been handled in this way, but the purchaser secures the full value by having this class of stock. In comparison it is cheaper than lower priced ordinary nursery grown evergreens.

Wherever evergreens of this character are quoted in the catalogue, the size is followed by the words "with ball."

About the 15th of April we shall have ready for distribution a special catalogue with full illustrations, sizes, prices and general description of these evergreens. Copy will be sent upon application.

*Quercus rubra.* Red Oak.

THE use of our American Oaks for Street, Avenue and Boulevard planting is not a new idea. It has been going on for years and in Washington, Boston and Baltimore may be found many streets where Oaks are successfully used for this purpose.

The Oak is not a slow grower, as is commonly supposed. On the contrary under ordinary conditions and if properly planted it will make as much growth in a year as the Norway and Sugar Maple and give greater satisfaction.

In most cities it is difficult to grow shade trees. They do not get sufficient water and the soil is poor, consequently it is necessary to use deep-rooted trees. In this respect the Oak is especially good.

All sorts of insects prey on the leaves of trees to more or less extent, and in cities they are particularly troublesome—but they seldom attack the Oak.

In planting Oaks it is necessary that they be severely pruned at once—all side branches should be cut back to about a foot from the main stem. If this is done, every tree will grow and the new shoots will make from one to two feet the first year.

For street planting we particularly recommend the Pin Oak.

Our stock of Oaks of all sizes is the largest in the country.

THOMAS MEEHAN & SONS, INC.

Wholesale Nurserymen

Dreshertown, Montgomery Co., Pa.
